Long-term vision

Pursue further growth, building a strong business foundation that can overcome major changes in the environment

Evolve our business model and achieve sustainable growth by incorporating

DX and sustainability

into the Business strategy

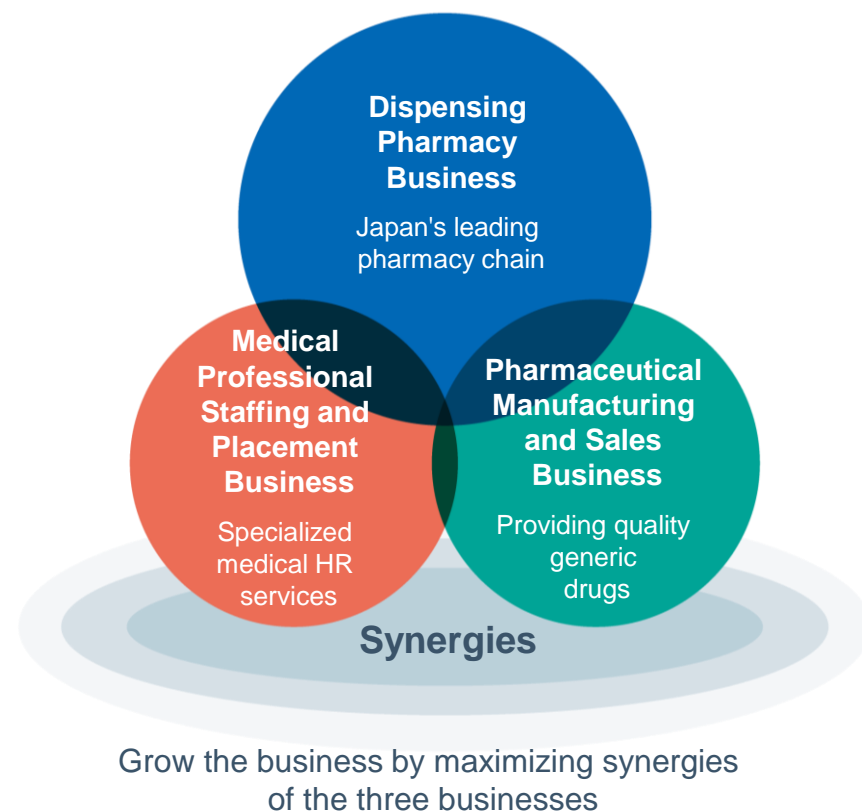

Nihon Chouzai regards ICT as a key factor in growth and has been developing an ICT strategy for many years. Going forward, we will continue to pursue business transformation through the use of digital technology, create value, and achieve further growth.

FY2021

Net Sales **278.9 billion yen**
(consolidated)

FY2031

Net Sales **1 trillion yen**
(Forecast of total value of three businesses)

Changes in the Business Environment

The shape of next-generation pharmacies thriving in a changing environment

Amid a super-aging society and shrinking population, the healthcare environment in Japan is being rocked by moves to curb social security costs and labor shortages

Changes in the Environment

Social Needs

- Expectations for family pharmacist, pharmacy roles
- Functional differentiation (regional cooperation pharmacies, specialized medical institution cooperation pharmacies)
- Promotion of generic drugs
- Super-aging society, declining population

Industry Restructuring

- Pharmacy industry realignment
- Generic drug manufacturing industry realignment

ICT in Healthcare

- Spread of electronic medication notebooks
- Spread of online medication guidance
- Digitization of healthcare information
- Widespread use of electronic prescriptions

Government Policy

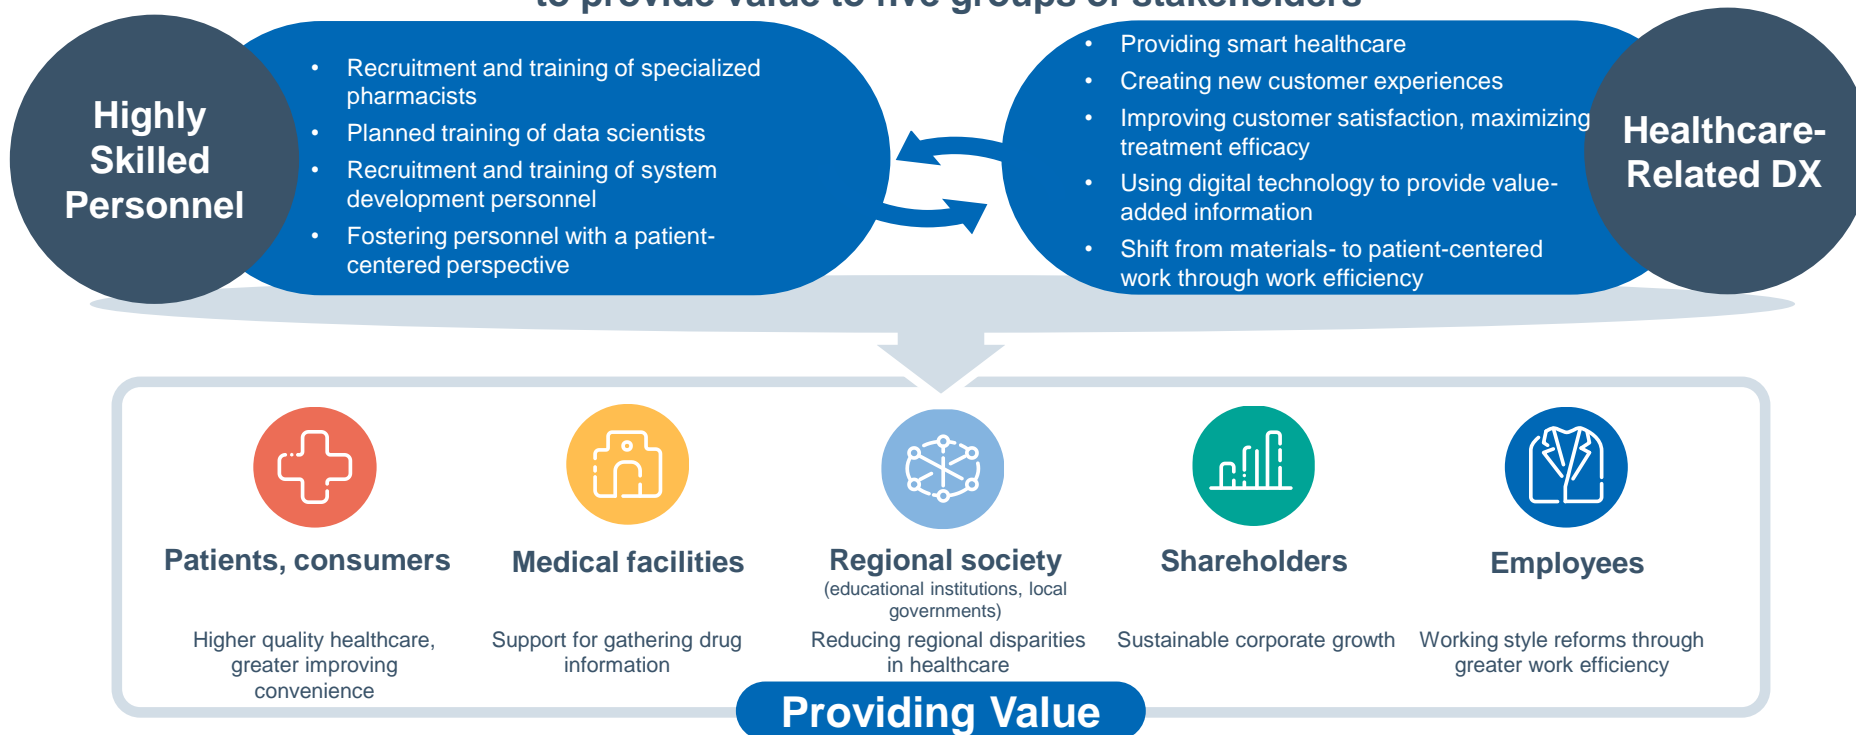

- Revision of Pharmaceuticals and Medical Devices Act
- Dispensing fee revisions
- Nursing care fee revisions
- Drug price revisions
- Working style reforms

Nihon Chouzai will realize the digital transformation of existing businesses and create a new earnings base through the fusion of highly skilled medical personnel with healthcare-related digital transformation (DX). We will help solve social issues by achieving both healthcare safety and an efficient operating framework.

Fusion of personnel and healthcare-related DX

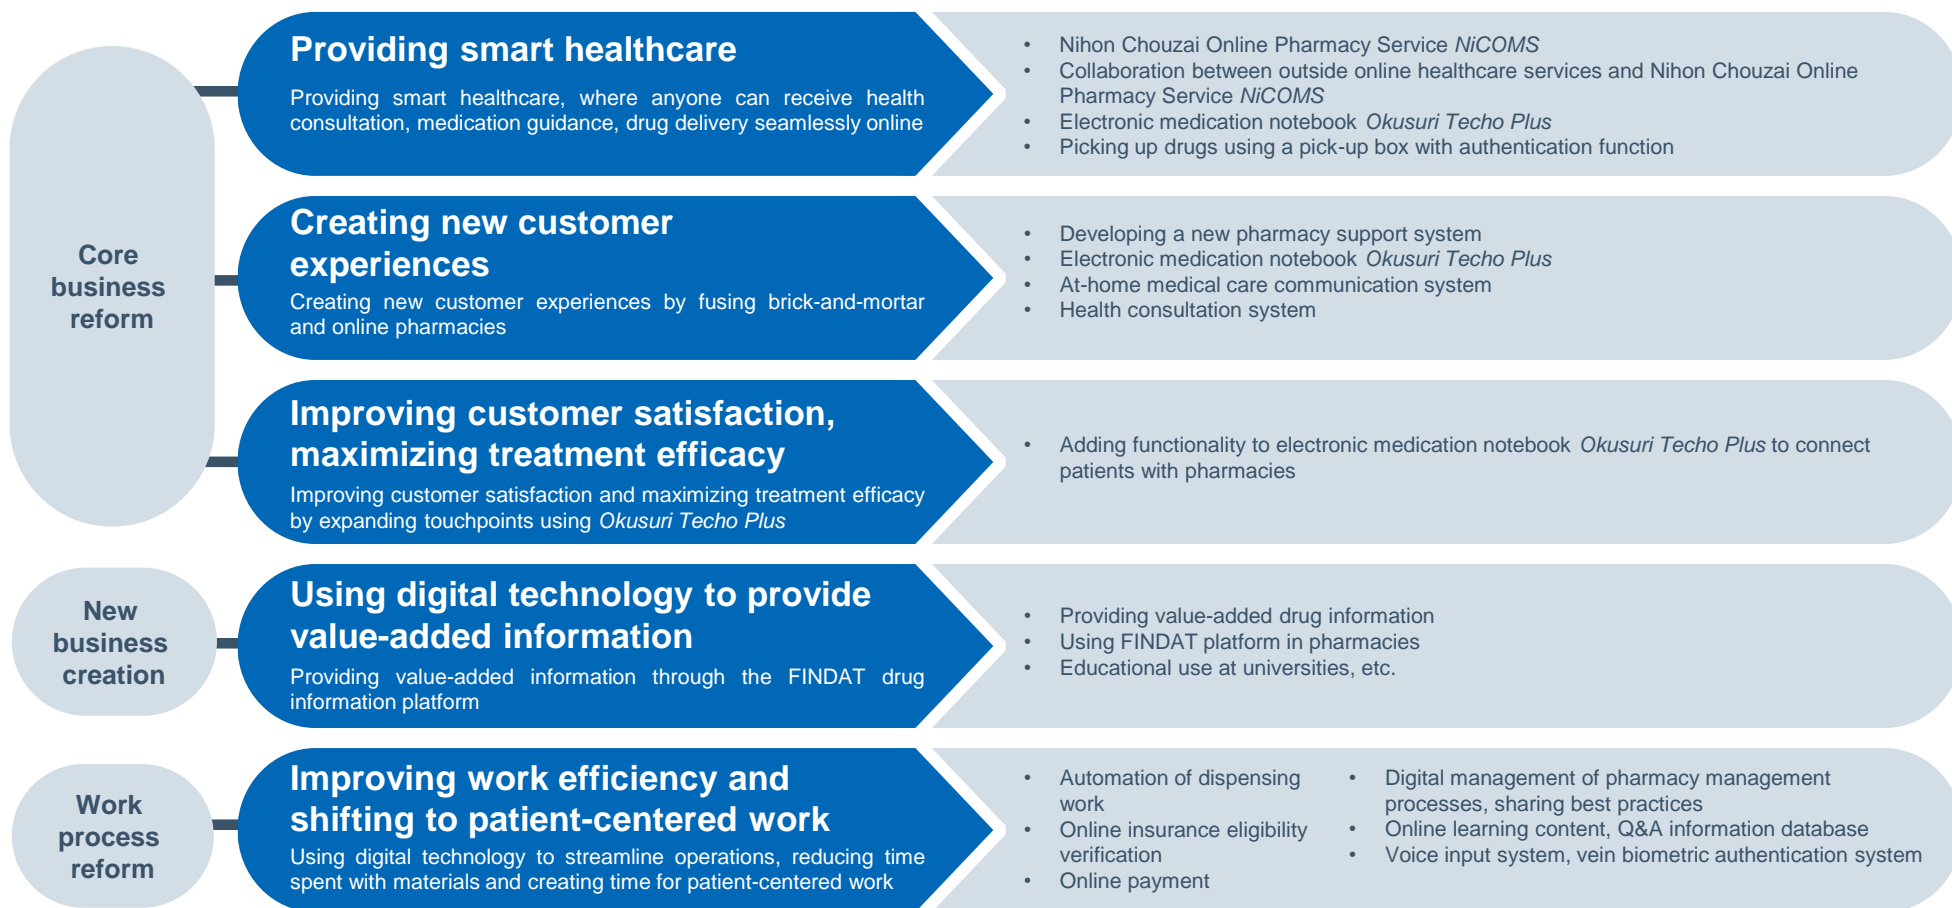

Through a fusion of highly skilled medical personnel with healthcare-related DX, we will evolve existing services and create new medical services

Evolving existing services and creating new medical services to provide value to five groups of stakeholders

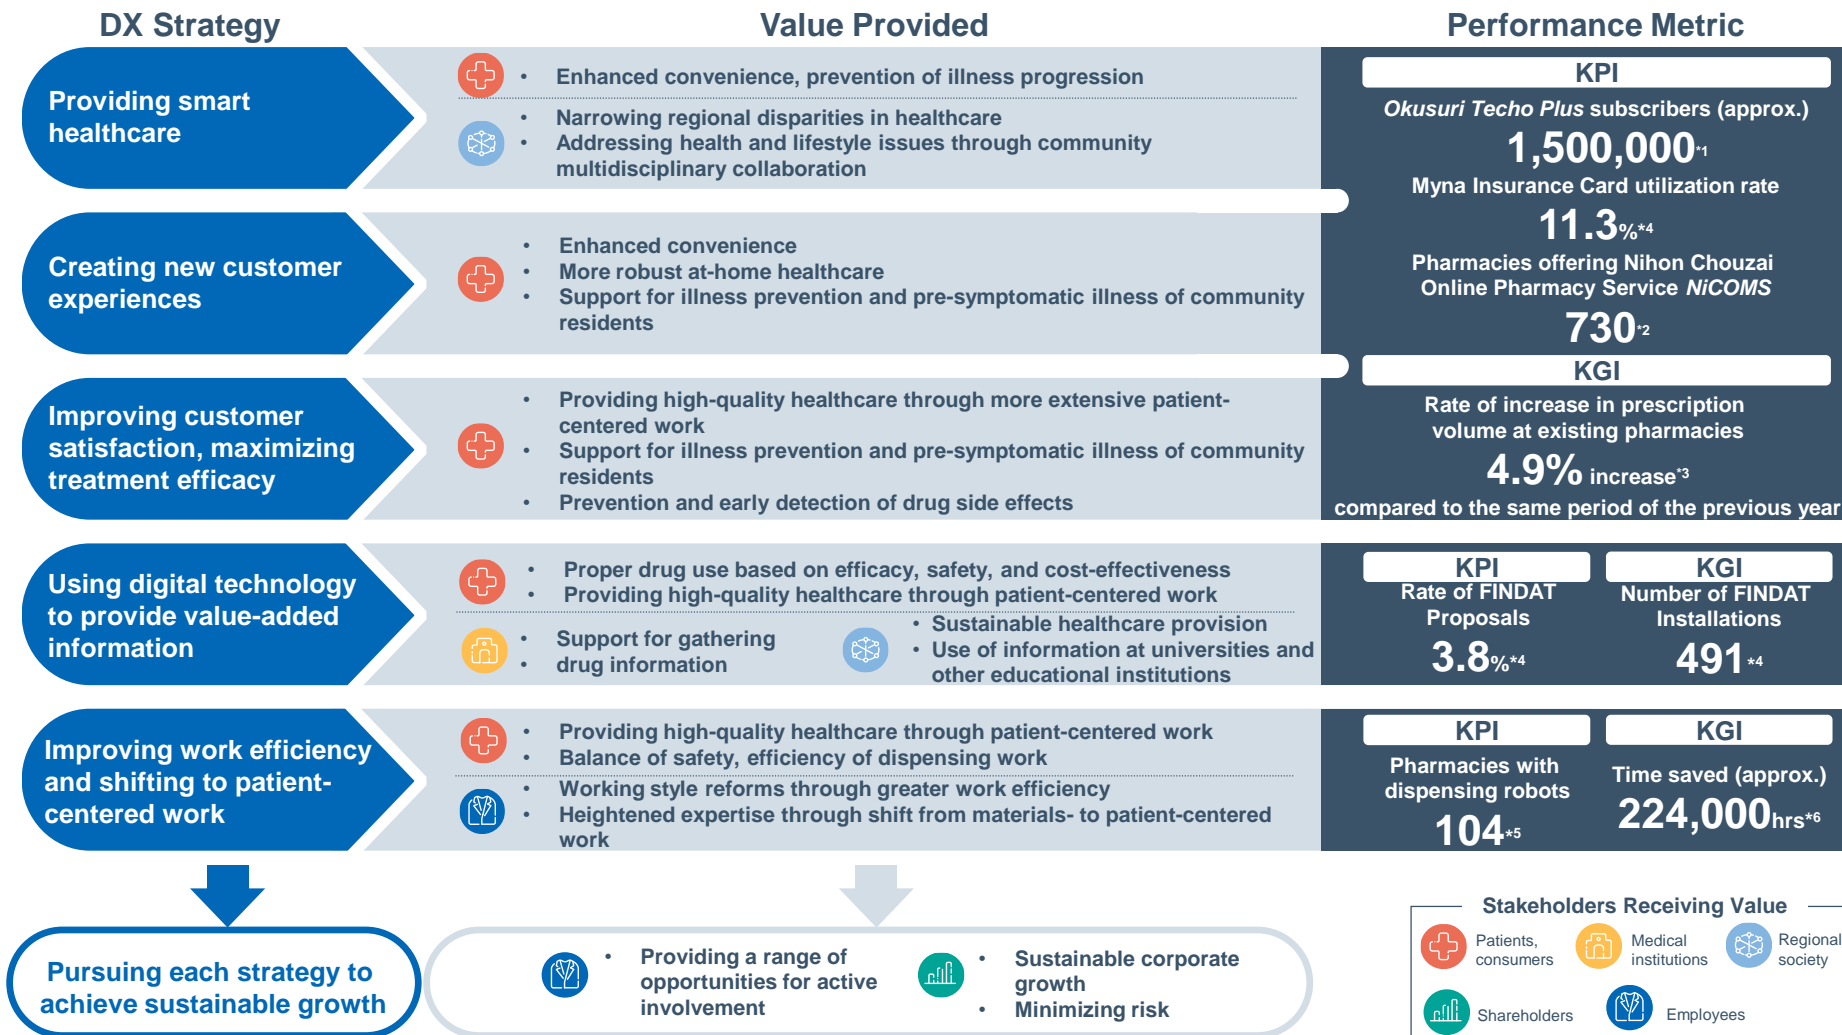

5 DX strategies

Create value and achieve dramatic growth using DX to transform each core business area, create new business, and transform work processes

Value Created through DX Strategies

Five DX strategies to provide value to stakeholders

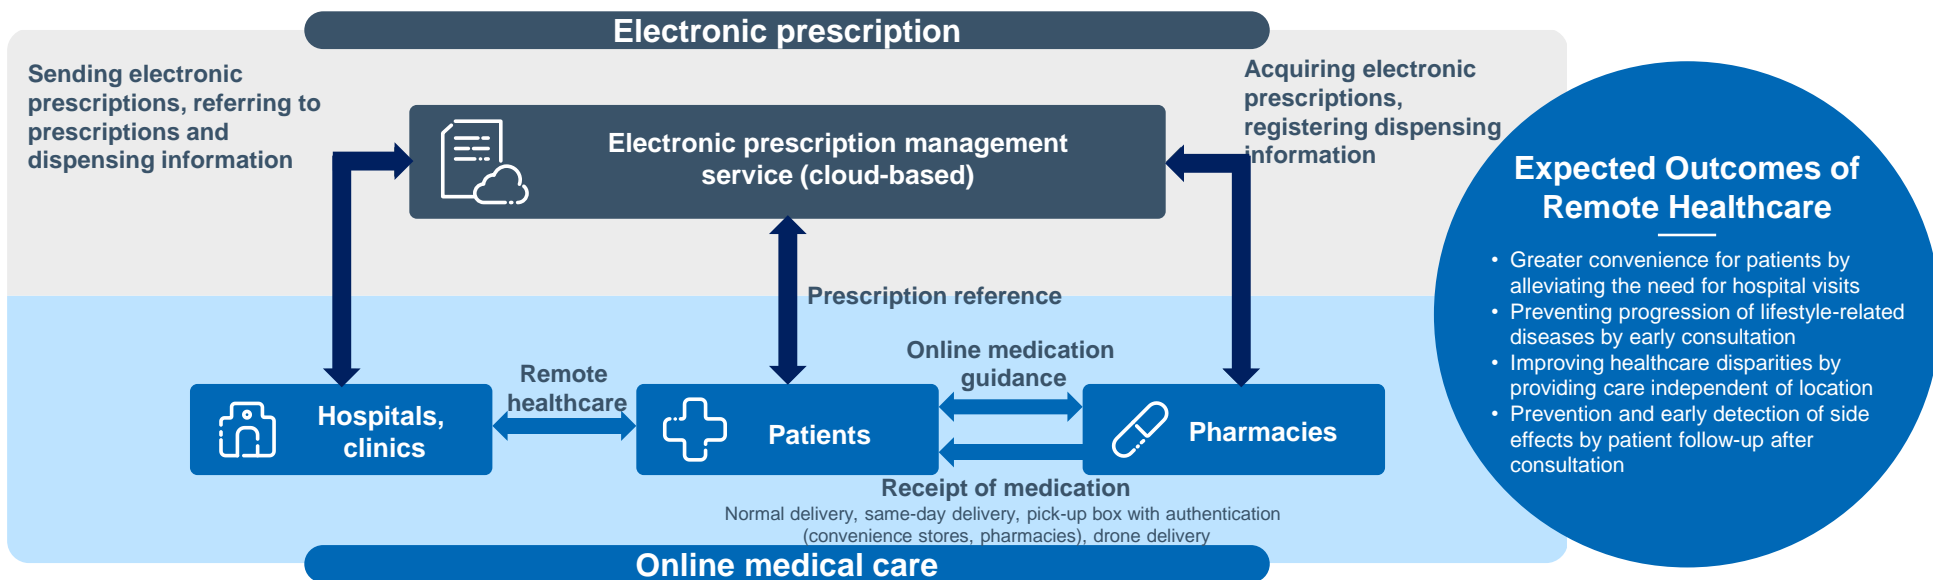

*1 As of the end of July 2023 *2 As of the beginning of September 2023 *3 April-June 2023 *4 As of the end of August 2020 *5 As of the beginning of September 2023 *6 April 2022-March 2023

Measures to Implement DX Strategies: Core business reform

Building a system to move forward with remote healthcare

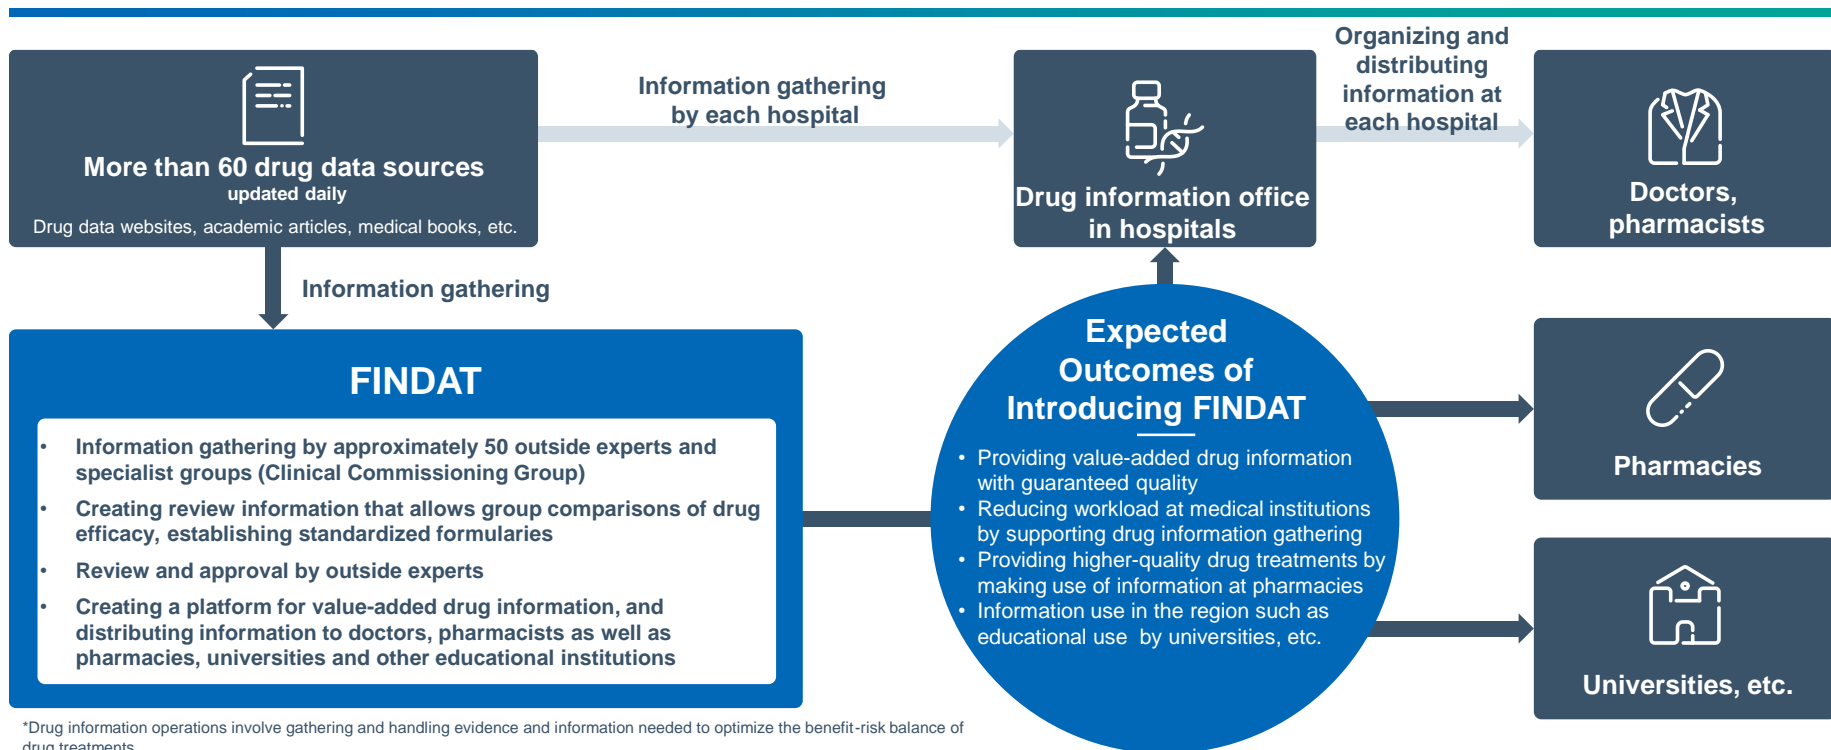

We will provide smart healthcare that allows anyone to receive health consultation, medication guidance, and drug delivery seamlessly online

By digitizing prescriptions and putting the process for receiving drugs online, we are building a system where patients can receive healthcare services regardless of location. We will contribute to healthcare ranging from advanced to community-based healthcare, supporting a care cycle including prevention of illness or progression, treating pre-symptomatic illness, drug treatment, and at-home healthcare.

Measures to Implement DX Strategies: New business creation

Providing value-added information through the FINDAT drug information web platform Supporting the drug information operations of hospitals and pharmacies

Because they involve collecting and organizing a massive number of information sources, drug information operations require each hospital to hire specialized personnel and invest significant resources. Introducing the FINDAT platform will enable hospitals to offer high-value-added information, while at the same time reducing the workload of each hospital's drug information office.

Measures to Implement DX Strategies: Work process reform

Using digital technology to streamline operations
**Reducing time spent with materials and
creating time for patient-centered work**

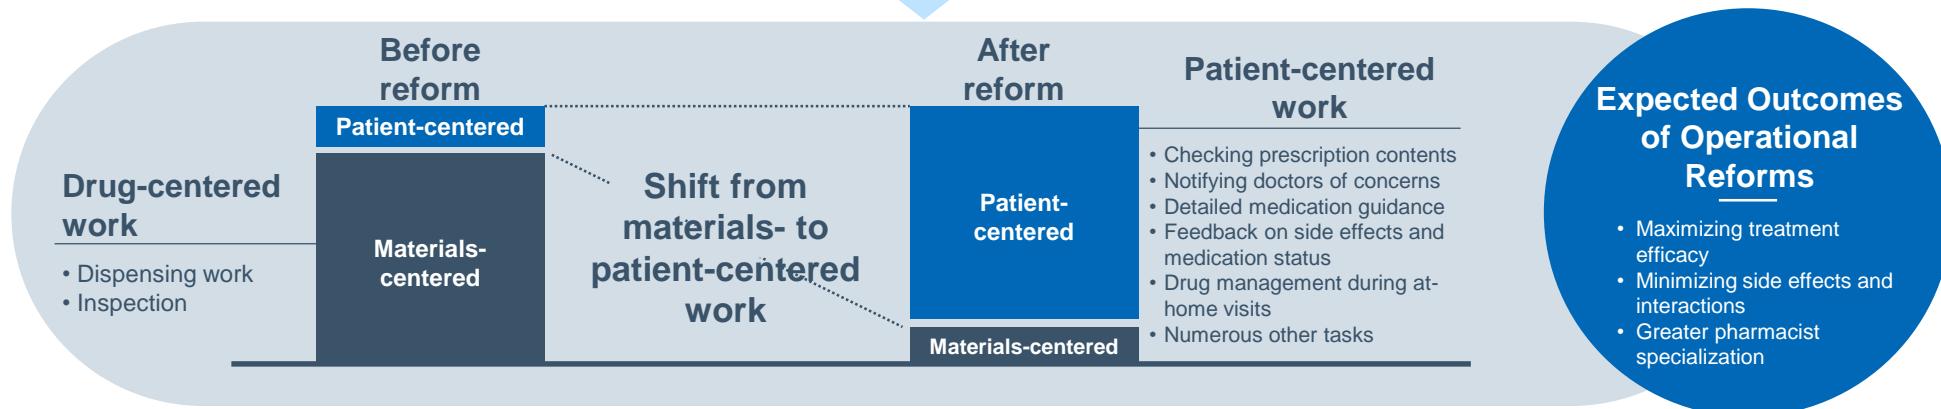

Enhancing healthcare services by freeing up time through increased efficiency

Using equipment to ensure accurate, safe, and efficient dispensing work

Digitization of prescriptions,
data-linked equipment

Filling prescriptions using
dispensing robots

Inspections using image
recognition equipment

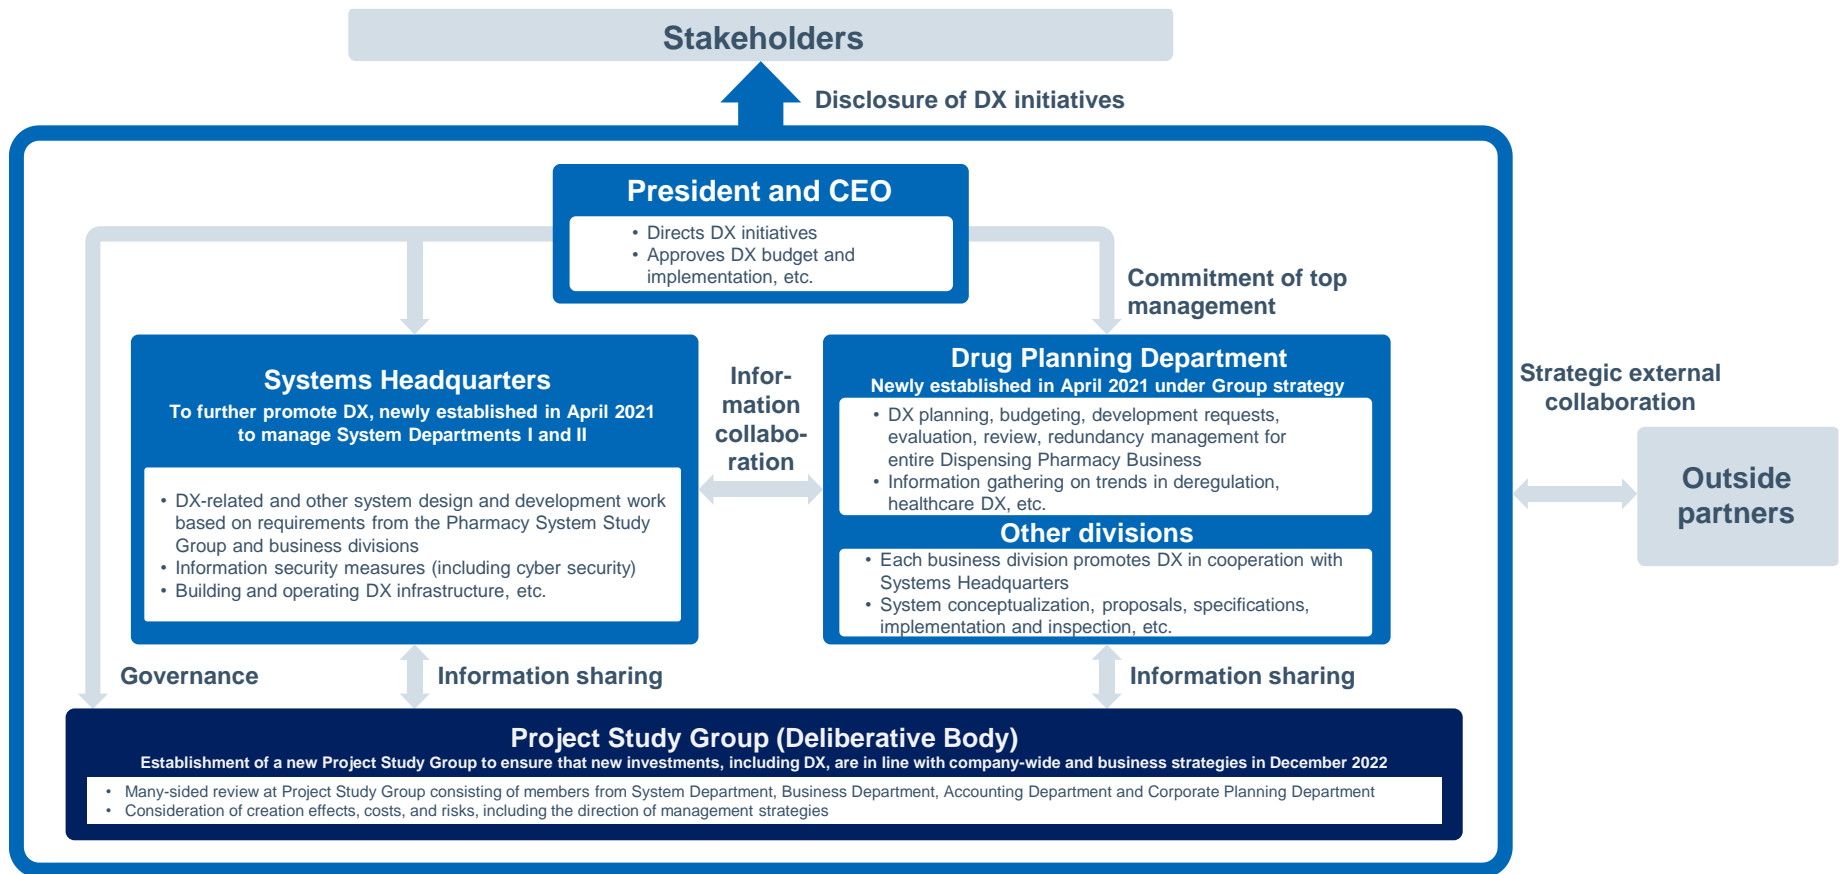

Digitizing prescription contents and linking data makes it possible for robots to carry out dispensing work and image recognition devices to carry out inspections, ensuring the accuracy, safety, and efficiency of operations. Allocating time freed up by these activities to patient-centered work contributes to enhanced services, proper use of medications, and greater pharmacist specialization.

Foundations for DX: Organizational framework

DX framework involving business, systems divisions

Top management is committed to promoting DX through a dual approach focused on both the business and system sides

Foundations for DX: DX professionals

Hiring and training human resources with multifaceted perspectives

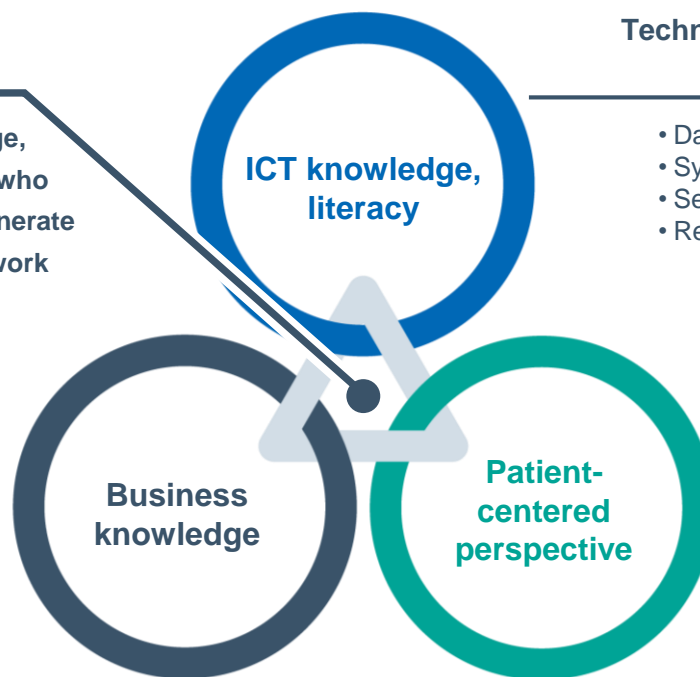

Hiring and training personnel with diverse backgrounds and skills

The ideal DX professional

Hiring and training personnel with knowledge, literacy, and a patient-centered perspective who can transform existing business models, generate new businesses, and transform and create work processes

Understanding of medical regulations and frameworks from a business perspective

- Development, training of managerial personnel
- Position-based training
- Senior-subordinate guidance system

Technical understanding and literacy with ICT, able to manage system development

- Data scientist training (general, advanced)
- Systems training (machine learning, AI, programming)
- Security training
- Recruitment and Training of system development staff

Rethinking work processes from the patient's perspective

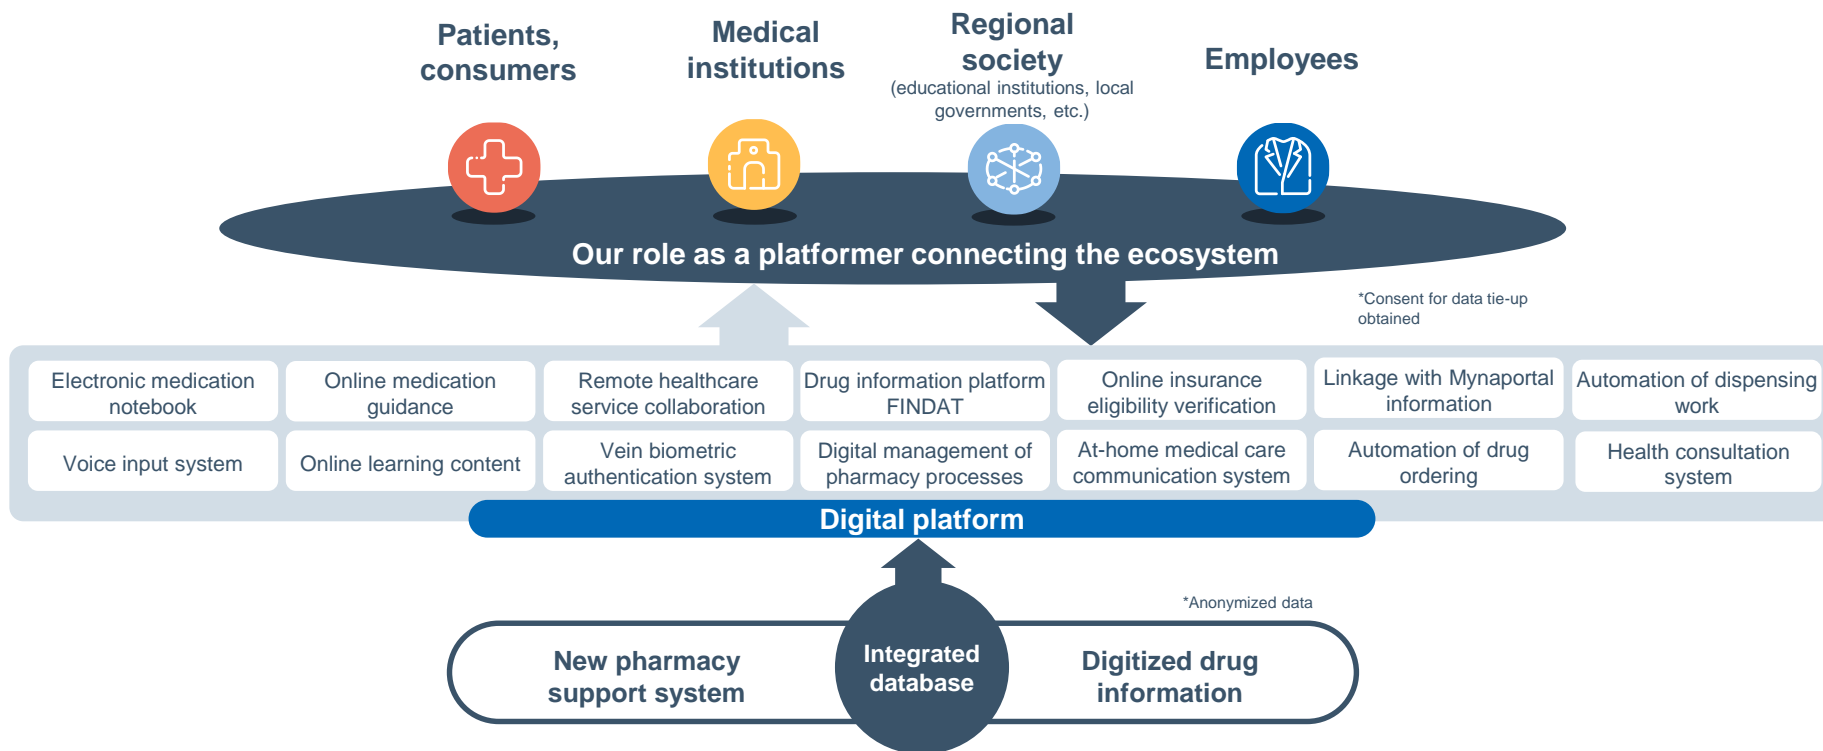

- Accumulating intellectual property through anonymized data analysis and marketing research from the patient's perspective
- Patient satisfaction survey
- Service excellence training
- Customer service award

We are working to attract and retain DX professionals through new hires, in-house recruitment, promotion from other divisions, etc. We have also established various training and evaluation systems to cultivate DX professionals with a multifaceted perspective and will further enhance recruitment and training in this area.

Foundations for DX: IT infrastructure

Building a robust IT infrastructure to promote DX

We are developing a digital platform that connects various stakeholders and creates new value

We centrally analyze and evaluate various data* obtained from pharmacies and various drug information sources. Capitalizing on these comprehensive databases, we create new value for stakeholders through our digital platform.
